

VARIPROTECT® 800

Maximum flexibility and minimum space requirement

SAVING SPACE AND TIME

INDIVIDUAL AND EXACT PROVISION OF CORRUGATED PAPER CUT TO SIZE

The VariProtect® 800 is an extremely compact corrugated paper cutter which is easy to operate and designed for a sheet width of up to 800 mm.

The VariProtect® enables time-saving and simple cutting of corrugated paper in any lengths using a pedal or hand switch or, alternatively, in sensor-controlled extraction mode. The conveying speed, paper length and quantity are pre-set using an innovative control panel. This ensures that only the volume of material actually required is used. With zero wastage, maximum flexibility and minimum material and logistical costs, it is ideal for our ComPack® corrugated product and both DUO-Pack and Formpack.

The VariProtect® 800 corrugated paper cutter is available in a table top or undertable version and can be integrated into the existing packing station environment.

VARI PROTECT 800

Technical data

- Lengths: as of 100 mm
- Speed: approx. 1.5 m/s
- Output: up to 30 cuttings per min.
- Dimensions: 210 x 230 x 1,050 mm
- Weight: approx. 45 kg
- Voltage: 230 V, 50 Hz
- Electric power: 350 W
